- Target version set to 1.3.32

In testing issue 273 I see that color changes have been added, but Race car ID column has not been built yet, Also Steve will you be updating the help file to include a legend on how to interpret the race passing page and color codes?

I wasn't aware that the help file was editable. If you can show me how to edit it I can.

The help file is.. In transition still. We started converting from chm to wiki to dita some time back but I don't remember how far we got with that.

DOC/DITA/build.bat and friends might shed some light on the subject
