In what way does it not work?

Sorry Steve, with initial testing it appeared that color coding was not included with update. Further testing showed that it works as designed. The color coding doesn't show till you scroll down to past the warm up laps.

Regarding the release candidate not working, when you choose to update database as prompted there is an extended delay before the splash screen starts leaving the user to think the program is not working

#5 - 03/15/2016 04:49 AM - Walter Pate

- *Status changed from New to Closed*

- *Priority changed from High to Low*

Ts version of release candidate has changed to RC3
