Target version:	Future	Spent time:	0.00 hour
Description			
<p>It is not the most ideal situation but sometimes a new transponder is introduced during Qualifying or Heats. Currently there's not a way to add that new transponder other than going to the "choose event" dialog box or in Registration mode.</p> <p>It would be very helpful if we can add a new transponder while in the Qualifying or Heats mode.</p>
