Once the Qualifying started I had limited access to the scoring computer to test so I tried testing on my computer using scoreboard simulator. I was able to get qualifying to display on my computer using a different WQMA database than the 2017 Grands. After Qualifying was over I tried then to connect the actual scoreboard and I did get qualifying to work with a different race (probably race 4 2017) But when I installed the recent WQMA database after Qualifying was over and opened the 2017WesternGrands race, my scoreboard function quit working as well. I am able to see the qualifying on my W7 computer at home (using older WQMA database)

Jamie, These are the classes and Qualifying numbers that I found are missing in the Registration Quick sheet. These missing numbers are possible indications of the User deleting records instead of using NO SHOW as a status, or reassigning numbers (which has affected race scoring in the past)

This was caused by the web scoreboard changes. Should be fixed now. Please test the missing numbers to see if they cause further issues on the qualifying page.
