Target version:		Spent time:	0.00 hour
Description			
when you X out of unassigned transponder window you can't get it back			

History

#1 - 05/08/2021 07:13 PM - Jamie Pate

- File *hide transponder bug.png* added

The issue is that clicking in the wrong spot will undock the panel and turn it into an annoying window that the user is likely to X out. There's no way to recover the panel after that.

The unassigned transponder dropdown also ceases to function when the panel is undocked.

undocked%20transponder%20bug.png

To work around the issue users should never click anywhere on the panel except the hide checkbox
